

Nautical Chart Production with CARIS Paper Chart Composer

E-Learning Course Requirements

Course Requirements

This document lists the requirements for someone to take this CARIS self-paced online training course. It assumes that you will be running the CARIS Paper Chart Composer software and accessing the online course on the same computer. CARIS cannot guarantee that you will be able to complete all parts of the training course if your computer does not meet the following requirements.

CARIS Software and License

A copy of the CARIS Paper Chart Composer software is required in order to get the most out of this training course. If you choose to take this training course without a valid Composer license, you will not be able to complete the training exercises portion of the course.

This course is based on Paper Chart Composer version 2.1.

The CARIS software and license are not included with this course.

Operating System

The self-paced online training course can be accessed from an internet browser running on most modern Windows-based computers.

CARIS Paper Chart Composer is certified to work with Windows® 7 Professional with Service Pack 1 or with Windows® 10 Professional. It is also expected to work with Windows® 8.1.

Minimum Computer System Requirements

The minimum computer requirements for CARIS Paper Chart Composer are:

- Processor: Intel® Pentium® 4 – 2 GHz or faster processor.
- Memory: 2 GB of RAM.
- Hard Disk: 1 GB of available hard disk space for installation.
- Display resolution: 1024x768 or better screen resolution.
- Display memory: 8 MB video card which can display 16-bit colour.
- Dual monitors are recommended but they are not a requirement.
- Port: USB or Parallel port for CARIS software license key/dongle.
- Audio: headphones are recommended – the videos include audio

Internet Connection

This course requires a high-speed internet connection in order to access all the course materials including the training videos.
