

IHO S-57 Electronic Navigational Chart Production with CARIS S-57 Composer

Teledyne CARIS E-learning Course Requirements

This document outlines the computer requirements for someone taking this self-paced online training course. It assumes that you will be running the CARIS S-57 Composer software and accessing the online course on the same computer. CARIS cannot guarantee that you will be able to complete all parts of the training course if your computer does not meet the following requirements.

CARIS Software and License

Access to a copy of the CARIS S-57 Composer software is strongly recommended. If you choose to take this training course without a valid Composer license, you will not be able to complete the training exercises portion of the course.

- This course is based on **CARIS S-57 Composer v4.1** and it is expected to work with Composer 4.1.x updates.
- An entitlement ([EMS License](#)) for **S-57 Composer** module.
- The CARIS software and license are *not included* with this course.

Operating System

This online training course can be accessed from an internet browser running on most modern Windows-based computers.

CARIS S-57 Composer is a 64-bit program that is certified to run on Windows 10® 64-bit operating systems.

Minimum Computer details

The minimum computer requirements for CARIS S-57 Composer are:

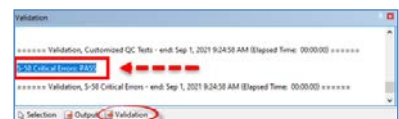

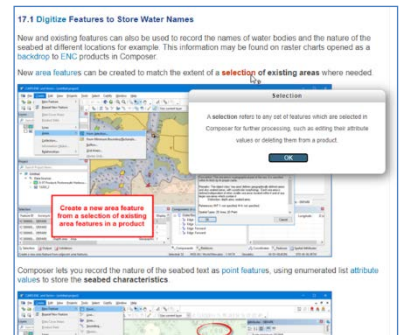

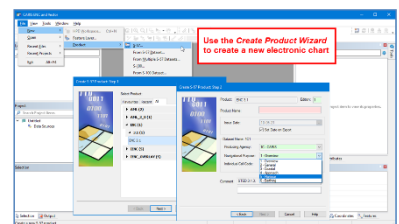

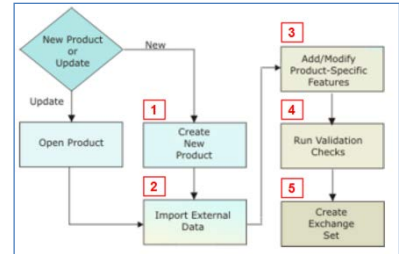

- Processor: Recent generation multi-core CPU.
- Memory: 16 GB of RAM.
- Hard Disk: 1 GB of hard disk space for software installation.
- Display memory: display adaptor with 512 MB of memory.
- Audio: to hear audio on the videos (headphones are recommended)
- Dual monitors are recommended but they are not a requirement.

Internet Connection

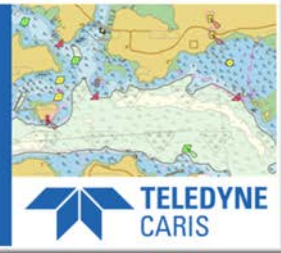

This course requires a high-speed internet connection in order to access all the course materials such as videos.

Internet Browser

This training course is designed to be compatible with most modern internet browsers such as Google Chrome, Firefox and Microsoft Edge. Due to the large number of available browsers, and the frequency with which new versions become available, CARIS cannot guarantee that all parts of the course will work on every browser version.

Teledyne CARIS E-learning Course Requirements

Internet Browser Settings

The following functions must be configured on your internet browser:

- Pop-up windows must be enabled
- Cookies must be enabled
- Java must be installed, up to date and enabled

These settings are required in order to view the training course videos, which may not display if any of these settings are not enabled.

Check that these items are correctly set up before starting the course. If you need more information, refer to your browser's help and support materials for instructions.

Course Materials

Most materials in the course are provided as web pages that you can view in your internet browser program. Some course documents are provided as PDF format files, and the training videos with audio are recorded as MP4 format files. Most modern internet browsers should be able to view these PDF and videos directly. Otherwise, ensure that your computer includes third-party programs to view these files.
